

When was the last time you spent \$8.00 and gained 10 horsepower?

PROVEN RESULTS ON THE DYNO*:
 After cleaning with CRC® MAF Sensor Cleaner this stock 2002 BMW M3 **gained 10 horsepower**, almost 3 ft.-lbs. of torque and the air/fuel ratio was corrected closer to the optimum 14.7:1!

Introducing . . .

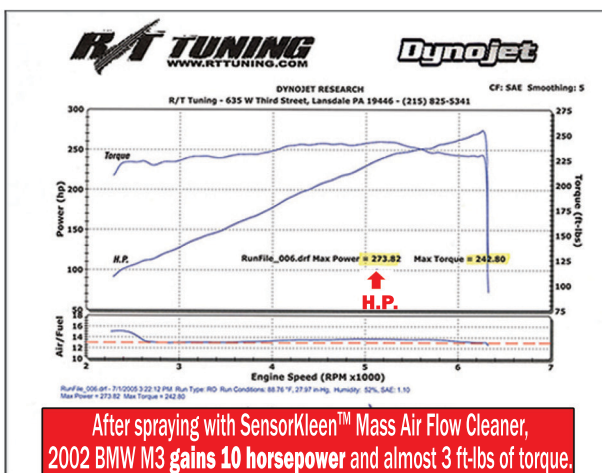

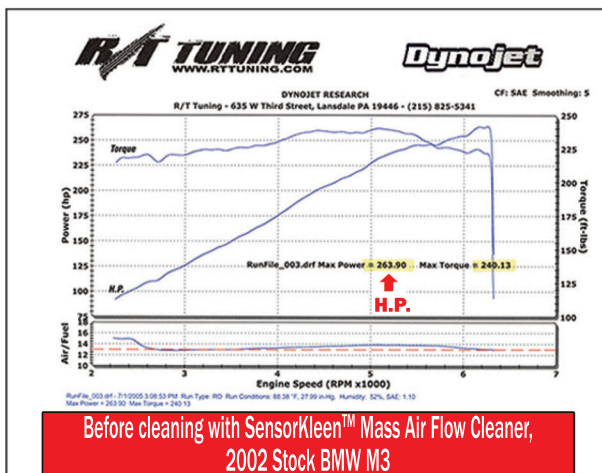

THE ORIGINAL
CRC SENSORKLEEN™
MASS AIR FLOW CLEANER

Pollen, dust particles, soot and oil can build up and burn onto MAF sensor hot-wires causing incorrect measurements of air flow and mass. In turn, the air/fuel ratio will be rich with fuel resulting in sputtering, hard starting, stalling, excess emissions, wasted fuel and power loss.

- Safely Cleans MAF Sensors
- PLASTIC SAFE & Leaves No Residue
- Increases Horsepower
- Decreases Hesitation & Pinging
- Improves Fuel Economy
- Reduces Rough Idle
